Akrem GOMRI

AI Engineer

Early-Career AI Engineer | Driven by Scalable Data Solutions and Real-World Impact. With a strong foundation in data systems and software engineering, I thrive at the intersection of infrastructure and analytics. I'm eager to grow in an AI engineering role where robust pipelines and clean architecture turn data into business value.

Languages

English
Advanced level

French
› TCF : 557/699

Soft Skills

- Ability to conduct in-depth research

- Analytical mindset and attention to detail

- Teamwork

- Autonomous and organized

Education

Master's in Artificial Intelligence and Cyber-Physical Systems (IA2S)
Since September 2023 Paris Est Créteil University (UPEC) Paris, France
https://shorturl.at/biuUY

Software Engineer
From September 2020 to August 2023
Higher Institute of Applied Science and Technology Sousse, SS, Tunisia
https://issatso.rnu.tn/formation/type/ingenieurs

Work experience

End of Study Internship
From September 2024 to March 2025 TotalEnergies Digital Factory 31 Rue des Jeuneurs
Development of a Predictive Solution to Anticipate Stuck Pipe Risks (a critical challenge for safety and profitability in oil drilling operations)

Key Contributions:

- Ingested and processed large-scale drilling data using PySpark in Databricks, leveraging parallel computing for efficient feature engineering.
- Built robust data pipelines to feed a machine learning model predicting stuck pipe incidents 2 hours in advance.
- Delivered the solution as a REST API integrated with real-time dashboards used by offshore teams.

Technical Skills

Programming languages & Frameworks
Python (intermediate), PyTorch, TensorFlow, Hugging Face Transformers, FastAPI, LangChain, LlamaIndex, NumPy, Pandas

LLM & NLP
Transformer architectures (GPT, BERT, LLaMA), Tokenization, Prompt Engineering (zero-shot, few-shot, chain-of-thought), Fine-tuning (LoRA, PEFT), RAG (Retrieval-Augmented Generation), Text generation & summarization

Cloud & Infrastructure:
AWS S3, AWS Lambda

Data & MLOps
MLflow, Docker, Git, CI/CD, Kafka, Kubernates

Other Tools & Concepts
LangChain agents, Experiment tracking, OpenAI / Claude / Mistral APIs, Linux, Bash

Projects

Human Activity Recognition using Video Classification
From November 2023 to February 2024 Computer vision, CNN, LSTM, Pose detection

Certifications and Professional Development

IBM Professional Certificate in AI Engineering
From May 2023 to November 2023
MUST university. 30 Rue Platon, Le Kram 2060, Tunis, Tunisia
Certifications : https://www.linkedin.com/in/akrem-gomri/details/certifications/

Specialization in AI Engineering
From May 2023 to November 2023 MUST University Tunis, Tunisia
