Akrem GOMRI

Data Engineer

Early-Career Data Engineer | Driven by Scalable Data Solutions and Real-World Impact. With a strong foundation in data systems and software engineering, I thrive at the intersection of infrastructure and analytics. I'm eager to grow in a data engineering role where robust pipelines and clean architecture turn data into business value.

Languages

English
Advanced level

French

Soft Skills

- Ability to conduct in-depth research

- Analytical mindset and attention to detail

- Teamwork

- Autonomous and organized

Education

Master's in Artificial Intelligence and Cyber-Physical Systems (IA2S)
Since September 2023 Paris Est Créteil University (UPEC) Paris, France
https://shorturl.at/biuUY

Software Engineer
From September 2020 to August 2023
Higher Institute of Applied Science and Technology Sousse, SS, Tunisia
https://issatso.rnu.tn/formation/type/ingenieurs

Work experience

End of Study Internship
From September 2024 to March 2025
TotalEnergies Digital Factory 31 Rue des Jeuneurs
Development of a Predictive Solution to Anticipate Stuck Pipe Risks (a critical challenge for safety and profitability in oil drilling operations)

Key Contributions:

- Ingested and processed large-scale drilling data using PySpark in Databricks, leveraging parallel computing for efficient feature engineering.
- Built robust data pipelines to feed a machine learning model predicting stuck pipe incidents 2 hours in advance.
- Delivered the solution as a REST API integrated with real-time dashboards used by offshore teams.

Technical Skills

Programming languages
Python, JavaScript, SQL

Data Engineering Tools
Apache Airflow, Databricks, PySpark, MLflow

Cloud & Infrastructure:
AWS S3, AWS Lambda

Containerization
Docker, Kubernetes

Data Handling
Processing JSON and CSV files, working with time-series data

Projects

Human Activity Recognition using Video Classification
From November 2023 to February 2024
Computer vision, CNN, LSTM, Pose detection

Human Activity Recognition Using Wearable Sensors
From October 2023 to December 2023
Computer vision, Temporal series, SVM

Certifications and Professional Development

IBM Professional Certificate in AI Engineering
From May 2023 to November 2023
MUST university. 30 Rue Platon, Le Kram 2060, Tunis, Tunisia
Certifications : https://www.linkedin.com/in/akrem-gomri/details/certifications/

Specialization in AI Engineering
From May 2023 to November 2023 MUST University Tunis, Tunisia
