Education

•Paris-East Créteil University *Since Sept 2023*
Master in Artificial Intelligence and Cyber-Physical Systems (IA2S) Paris, France

•Higher Institute of Applied Sciences and Technology *Sept 2020 - Aug 2023*
Computer Engineering, Software Engineering Sousse, Tunisia

•Higher Institute of Applied Sciences and Technology *Sept 2018 - May 2020*
Preparatory Studies in Math, Physics, Computer Science Sousse, Tunisia

Experience

•TotalEnergies Digital Factory *Sep 2024 - March 2025*
Data Scientist Paris, France
- Applied signal analysis and processing techniques (filtering, padding, masking, feature scaling, label smoothing) to time series data—collected over 3 years—from 33 wells with 20 sensors.
- Explored supervised and unsupervised anomaly detection using deep learning and machine learning (TCNs, Graph Attention Network, Tsfresh with K-means).

•Sopra HR *Feb 2023 - Jun 2023*
Software Engineer Tunis, Tunisia
- Designed and developed a scalable web application for career assessment, featuring a flexible permissions system to manage collaborator access and roles. Enabled personalized feedback and data-driven insights, enhancing user engagement and decision-making for career progression. Applied unit testing, automated functional testing, and CI/CD pipelines.
- Tools used: React, NodeJs, MongoDB, MUI, DevOps

Personal Projects

•Automated Job Application System Using LLMs and Selenium *Jan 2024*
An intelligent automation system that simplifies job applications on online job platforms.
- The application can handle any job application page by leveraging an LLM to analyze the page's source code and provide step-by-step instructions.
- Tools and principles: Selenium, LLM APIs, prompt engineering, AI agents.

•Human Activity Recognition via Video Classification *Feb 2024*
This project aims to recognize human activities from video sequences.
- Several approaches were used and compared: basic CNN, CNN + LSTM, pose detection, 3D CNN, and Slow Fusion technique.
- Tools: PyTorch for pose detection and TensorFlow for the rest.

Technical Skills

Languages: Python, JavaScript
Data Science: Pytorch, Numpy, Pandas, Matplotlib
Deep Learning knowledge: GANs, Auto-encoders, Transformers, CNNs, TCNs
Generative AI knowledge: prompt engineering, RAG, Chain-of-thoughts, LLMs,AI Agents
DevOps & CI/CD Tools: Git, Docker, Jenkins, Kubernetes, Selinium
MLOps: MLFlow,
Databases: MongoDB, PostgreSQL
Full Stack Development: React, Node.JS, Django, HTML, CSS

Certifications

•Professional Certificate in AI Engineering, IBM - MUST University *May 2023 - Nov 2023*
Link: linkedin.com/in/akrem-gomri/details/certifications/

•Certificate of Achievement in Artificial Intelligence, GoMyCode - Tunis *Jun 2020 - Aug 2020*

•Certificate of Achievement in Full Stack Js Course, RedStar - Tunis *Jun 2021 - Aug 2021*
